

THE PRIVIFY FORGE ADVANTAGE

Capabilities no other platform delivers.

CAPABILITY	PRIVIFY FORGE	OTHERS
Shadow AI / Rogue LLM Detection	✓	partial
Local LLM Detection UNIQUE	✓	✗
Agent-to-Agent Communication Visibility UNIQUE	✓	✗
Full Trace DAG with 800ms Replay	✓	partial
Host-Level Probes (Process / Network / File / MCP)	✓	partial
MCP Server Governance	✓	partial
Human-in-the-Loop Approval Workflows UNIQUE	✓	✗
AI Firewall & Real-time Intervention	✓	partial
Cost Attribution & Token Budget Enforcement	✓	partial
Quality SLA Enforcement	✓	partial
13 Compliance Frameworks UNIQUE	✓	✗
11 SIEM Platform Integrations	✓	partial
66 REST API Endpoints — Full Programmability	✓	✗
Kernel Policy Tamper Detection UNIQUE	✓	✗
Zero-Touch Kernel Driver Updates (OTA)	✓	✗
Machine-Bound Credential Encryption (DPAPI)	✓	✗

QUICK DEPLOYMENT — MINUTES, NOT DAYS
Agent-less · API-first · Works alongside existing infrastructure

PRIVIFY
FORGE

Privify Forge

FEDERATED OVERSIGHT & RISK GOVERNANCE ENGINE

Every AI agent.
Every interaction.
Governed.

The only platform that combines Shadow AI discovery, real-time behavioral observability, and policy-driven governance — purpose-built for enterprise AI deployments.

LIVE DASHBOARD PREVIEW

DISCOVER

- Find every AI in your environment
- Shadow AI & Rogue LLM**
Detect unauthorized AI usage via network intercept, process monitoring, and AI library fingerprinting
 - Local LLM Detection**
Identify Ollama, LM Studio, and private model instances running on-device — invisible to API-only tools
 - MCP Server Enumeration**
Auto-discover Model Context Protocol servers and map tool capabilities exposed to AI agents
 - Agent Process Mapping**
Map every AI framework (LangChain, AutoGen, CrewAI) and build a living inventory of your AI fleet

OBSERVE

- 360° visibility into every agent
- Real-time Event Streaming**
Live WebSocket feed of all 17 event types including API calls, DLP hits, and policy violations with sub-second latency
 - Trace DAG with Replay**
Reconstruct full agent call chains as directed acyclic graphs. Replay any session at 800ms cadence for forensic analysis
 - Agent-to-Agent Visibility**
The only platform tracking communication between orchestrator and subagents — critical for multi-agent AI systems
 - Cost & Quality Analytics**
Per-agent token spend, latency histograms, quality scoring, and SLA tracking across all AI providers
 - Resilient Telemetry Delivery**
50MB offline event buffer with jittered flush and exponential backoff — zero audit-trail gaps during connectivity loss or maintenance windows

GOVERN

Enforce policy. Control risk. Prove compliance.

Policy Engine

Keyword, regex, semantic, and context-aware rules. Configurable actions: alert, block, redact, or route for human approval.

DLP Scanning

12 data patterns: PII, SSN, credit cards, API keys, PHI, financial data. Scans every prompt and response in real time.

AI Firewall

10 threat signatures covering jailbreaks, prompt injection, loop detection, and data exfiltration attempts.

Human-in-the-Loop

Intercept high-risk actions for human approval before execution. Full approval audit trail with timestamps.

Cost Governance

Per-agent and per-team token budgets. Real-time spend tracking and automatic cap enforcement across providers.

SIEM Integration

11 platforms supported: Splunk, Elastic, Datadog, IBM QRadar, Microsoft Sentinel, and more — native and webhook.

Policy Integrity

CRC-verified policy integrity at enforcement time. Instantly alerts if policy is tampered in memory. Credentials machine-bound via OS-level encryption.

OTA Governance Updates

Centrally deploy policy and probe updates to every endpoint automatically — no IT tickets, no maintenance windows, no scheduled downtime.

REGULATORY COMPLIANCE IS NO LONGER OPTIONAL

The **EU AI Act** (enforcement from Aug 2025), India's **DPDP** rules, Singapore's **PDPA**, and Canada's **PIPEDA** all impose obligations on AI system operators. Privify Forge provides automated evidence collection, audit trails, and compliance scoring — reducing audit preparation from weeks to minutes.

13 Compliance Frameworks

Automated evidence collection & control scoring

100% automated

SECURITY

- SOC 2
- HIPAA
- PCI-DSS

PRIVACY

- GDPR
- CCPA
- DPDP
- PDPA
- PIPEDA

AI REGULATION

- EU AI Act
- DSA
- CA SB53
- NIST AI RMF
- ISO 42001
